## AlphaLISA<sup>®</sup> SureFire<sup>®</sup> Ultra<sup>™</sup>

# Human EGF Receptor L858R Total Detection Kit

Product number:

ALSU-TEGFR-B500, ALSU-TEGFR-B10K,

ALSU-TEGFR-B50K, ALSU-TEGFR-B-HV

## Kit specificity:

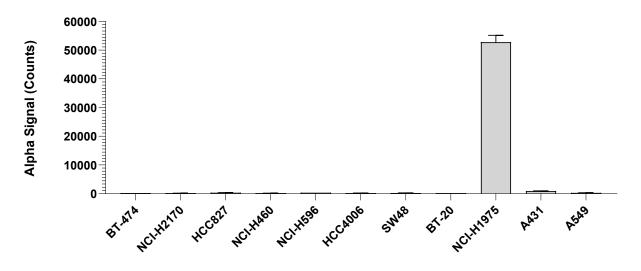

This assay kit contains antibodies which recognize the L858R mutation and a distinct epitope on EGF Receptor. The protein detected by this kit corresponds to UniProt ID P00533. EGF Receptor is also known as EGFR, ERBB1 and HER1. These antibodies recognize EGF Receptor L858R of human origin. Other species should be tested on a case-by-case basis.

### **Control lysate information:**

Positive Control Lysate: Prepared from NCI-H1975 cells, cultured to confluence in T175 flasks in 10% FBS containing media and lysed with 4 mL of Lysis Buffer.

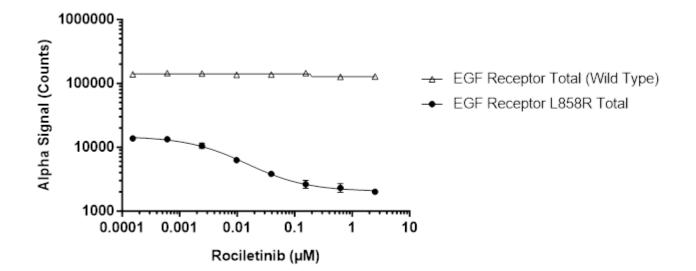

### **Representative data**

Data obtained for EGF Receptor L858R Total assay from screening various lysates prepared from cell lines that carry hotspot mutations or gene copy number amplification within the EGFR or ERBB2 gene, in addition to cell lines expressing wild type EGFR (A431, A459). Approximate number of cells/datapoint is indicated for the various cell lines.

Approx. 20,000 cells/datapoint

Data obtained with a 2-plate, 2-incubation protocol. NCI-H1975 cells were seeded at 40K cells/well in a 96 well plate and incubated overnight. Cells were treated with Rociletinib (L858R mutant-selective EGFR inhibitor) at the indicated concentrations for 24 hours. Cells were lysed with Lysis Buffer and assayed separately for Total EGF Receptor L858R and EGF Receptor (Wild Type) using respective *SureFire Ultra* kits. Equivalent to approximately 4,000 cells/datapoint.
